Message

It is with immense pleasure that today we present to you the 5th edition of Pakistan CIO Summit 2017 and 3rd edition of IT Showcase Pakistan 2017.

The summit and showcase has now become mature and is widely regarded as the only platform that annually gathers CIOs, CISOs, IT Heads, IT professionals and decision makers to network, learn and share experiences under one roof. At the same time, IT products and services providers anticipate to participate in IT Showcase Pakistan to avail this exclusive opportunity of presenting their services to the prospective customers and building long lasting relationships in a strictly professional and focused environment.

This year more than 300 delegates consisting of C-level executives will attend the summit, more than 500 preferred visitors will visit the showcase and 16 companies from Pakistan, China, UAE and UK will showcase their products and services.

I would sincerely like to thank all our sponsors, exhibitors, delegates, visitors, suppliers, specially my team and most importantly my family to contribute to the success of this event year after year. And above all, I would like to thank Almighty Allah to have given us the strength and ability to contribute our penny's worth to our society

I wish all participants a happy and successful event!!

Warm regards

Kamran Saeed
Summit & Showcase Director

CX Cloud

CX CLOUD
Customer Experience Platform

CX Cloud offerings provide scalability, agility and security. CX Cloud contact center solutions can improve your customer's journey by increasing personalization and by delivering consistent, connected customer experiences across touchpoints. We meet your customers' specific channel preferences, such as mobile, SMS and social. Choosing a cloud contact center solution can help your organization achieve these objectives while getting to market faster, and with more flexibility.

CX Cloud delivers the full range of cloud-based call center and contact center applications. These include ACD routing, IVR, reporting, provisioning and agent optimization applications, while securely

storing the business software and data on managed servers in remote data centres. In most cases legacy applications can be integrated with cloud services in a hybrid model to provide easy transition and maximum client flexibility.

Founded and operating in the region since 1990, Gulf Business Machines (GBM) is the number one provider of IT solutions, leveraging industry leading technologies to drive real business results for clients. GBM brings the power of the world's most renowned technology providers, IBM from its outset and the addition of the Cisco portfolio in 1999.

Originally established through its partnership with IBM, the companies have continued to evolve their relationship in order to meet the ever increasing demands of the ICT market. As a major driver and enabler for the advancement of society in the region, ICT is becoming the foundation upon which business is built. The increasing influence of the 'Smart City' ecosystem will require complex IT systems to support it, and GBM and IBM has been working closely to develop and deploy effective, related technologies over the recent years. GBM has therefore nurtured partnerships with IBM, as well as with number one technology players, investing in a talented, skilled workforce to apply innovative solutions that cater to clients' specific, complex and diverse IT needs. With on-the-ground, readily available expertise, GBM

provides round-the-clock support to clients across the region.

GBM Pakistan was established in 2007 and is currently operating as an IBM Gold Business Partner. GBM has offices in three locations serving several major customers in Financial, Telecom, Manufacturing, FMCG, Utilities, and Oil & Gas industries. With 60 employees within Pakistan and with link to 1200 experts in the Middle East, GBM has a unique and successful model of IT solution design and delivery. This year GBM Pakistan celebrated their 10th years of excellence and successful operations in the country.

GBM lives the ever-evolving culture of the local IT landscapes in which it operates, continually investing in training and development to ensure its experts can fully understand and interpret the growing needs of their clients. As a result, GBM is always well equipped to address the cutting edge, industry specific IT demands in every market. GBM is focusing on its customer experience by increasing its functional expertise to not only add value in customers' technology environment but to also be a part of their business growth.

Pakistan Cyber Security Association (PCSA)

Pakistan Cyber Security Association (PCSA) is a non-profit organization that strives to drastically improve the country's International standing on Cyber Security as per ITU Cyberwellness profile (https://www.itu.int/en/ITU-D/Cybersecurity/Documents/Country_Profiles/Pakistan.pdf) over the next 5 years. As per the ITU report, dated March 2015, Pakistan's ranking in the Global Cyber Security Index left much to be desired in almost all categories. In fact, even in South Asia, Pakistan had an embarrassingly poor overall ranking compared to neighboring countries.

Pakistan Cyber Security Association (PCSA) is geared to develop the Information Security and Cybersecurity ecosystem in the country which is

one of the main contributing factors for the ranking in the ITU report. PCSA will bring together industry, academia, research organizations, public-sector organizations and Cybersecurity professionals from all verticals to work together for the common national cause. PCSA invites all Information Security professionals to sign-up at its stall at CIO Summit. PCSA is led by the following Founding-Executive Team: Nahil Mahmood (Chairman), Ibrahim Amin (Co-Chairman), Asif Hayat (President), Hassan Ahmad (Treasurer), Faheem Ahmad (General Secretary). Various Executive committees and advisory-board cadres will be announced subsequently.

Smart Bank Branch Solution

by Centerm

Centerm has moved Forward from just offering Cloud Computing Thin Client and E-Commerce solutions to the complete **"Smart Bank" Solution**

The Centerm Smart Bank Branch Solution offers to turn the digital Challenge to the digital Opportunity. It helped solve 1000+ financial institutes core challenges , including four of the world's top 10 largest banks. Some of Centerm devices like Desktop terminals, Signature pad, integrated keyboard, integrated card reader , documents scanner, videos and audio recorder , form filling kiosk, Ticketing Kiosk and Mobile Terminals are the future of smart secured banking. It is an exciting future for smart bankers who appreciate the power of technology to enhance the client experience. The new banking reality means that the new generations of account holders may never see the inside of a bank building and those that do will be visiting smaller digitally-centric café style branches.

CX Cloud contact center solutions

by CXCloud

CX Cloud offerings provide scalability, agility and security. CX Cloud contact center solutions can improve your customer's journey by increasing personalization and by delivering consistent, connected customer experiences across touchpoints. We meet your customers' specific channel preferences, such as mobile, SMS and social. Choosing a cloud contact center solution can help your organization achieve these objectives while getting to market faster, and with more flexibility. CX Cloud delivers the full range of cloud-based call center and contact center applications. These include ACD routing, IVR, reporting, provisioning and agent optimization applications, while securely storing the business software and data on managed servers in remote data centers. In most cases legacy applications can be integrated with cloud services in a hybrid model to enable easy transition and maximum client flexibility.

IBM Flash Storage is the Future

by GBM Pakistan

Make the most of every microsecond to gain the edge you need to win

IBM Flash Storage is engineered to meet modern high-performance storage requirements: ultra-low latency, cost-effectiveness, operational efficiency, and mission-critical reliability. It accelerates the cloud, big data analytics, mobile and social systems, and the applications that will power the future of your business.

Making the move to IBM All-Flash Arrays enables true data agility - the automated, policy-driven reallocation of data to and from the proper storage medium, without a lot of human intervention or time-consuming, expensive steps. With these you can lower both Capex and Opex cost to gain greater value from your data. IBM Flash System is a family of all-flash Storage array that offers a comprehensive feature set. The family currently includes four models.

- IBM FlashSystem 900, the workhorse base model designed to provide extreme performance.
- IBM FlashSystem V9000 adds the industry-leading storage services and virtualization capabilities of IBM Spectrum Virtualize™
- IBM FlashSystem A9000, based on IBM Spectrum Accelerate™, uses an innovative grid architecture.
- IBM FlashSystem A9000R offers all the advantages of IBM FlashSystem A9000 in a rack configuration for performance and capacity scalability.

VMware Software-Defined Data Center

By ArcPoint Technologies

The mobile cloud era is changing line-of-business (LOB) expectations of IT. For IT organizations to securely deliver the anticipated improvements in service quality and speed, a Software-Defined Data Center (SDDC) approach is required. The VMware approach to the SDDC delivers a unified platform that supports any application and provides flexible control. The VMware architecture for the SDDC empowers companies to run hybrid clouds and to leverage unique capabilities to deliver key outcomes that enable efficiency, agility, and security. Enterprises using VMware technology have three ways to establish an SDDC and transition at their own pace: build their own using reference architectures; use a converged infrastructure; or use a hyper-converged infrastructure for which the full SDDC is delivered already implemented on the customer's hardware of choice.

NC Inc represents Centerm

by NC Inc

NC Inc represents Centerm the leading provider of cloud terminal, thin client and "desktop cloud" solutions in the Asia-Pacific region. It covered over 60% market share in China's Financial industry and has Installed over 3,000,000+ thin client. Centerm thin clients are highly efficient, well build, affordable and can connect to all large infrastructures like Citrix, VMWare, Microsoft RDP etc . It is a green product with low power consumption.

Centerm thin clients portfolio consist of standalone thin client as well as the fully configurable secured standalone PC type , delivering rich multimedia capabilities and full PC like user experience with optional SSD or HDD additional storage. With different display options Centerm also offers AIO units the perfect replacement for the standard Intel based i3,i5 and i7 PC.

SOPHOS

Harness the true power of the Cloud

by RapidCompute

RapidCompute's cutting edge infrastructure and services have proven to be game changers in the IT landscape of Pakistan, offering businesses unique solutions that best meet their needs. We now stand as the first and only PCIDSS3.2 and ISO27001:2013 certified Cloud Service Provider in Pakistan. This means there is nowhere safer to host your mission critical data than on our cloud. Our geo-redundant state of the art datacenters are built on the latest processor technology that power our virtual instances, and coupled with 10Gbps networking, give customers unprecedented performance and reliability at all times. Our facilities also house all flash-array storages that offer customers 10x more IOPS, 1/10th the latency, and more bandwidth and consistent performance. Find out more about how we can help shape your IT future at: www.rapidcompute.com.

People.Partners

by Softronics

People.Partners has been designed with the sole objective of bringing visible efficiency, improved controls and data insights for better decision making, ultimately affecting an organization's competitiveness and growth!

It is a stable product (that can align with your current as well as any future requirement), including Competency Assessment as well as Profiling (Behavioral Profiling, Intelligence Profiling, Emotional Intelligence Profiling and Personality Profiling), allowing you to hire the right person for the right position. We have a unique Performance Management Process, providing Line of Sight and Employee Performance-Potential Matrix. Further, People.Partners is fully compliant with Laws of Pakistan, UAE and KSA.

Process.Partners

by Softronics

Process.Partners has been developed specifically to help you with your IT Governance initiatives. It is not a generic GRC tool that claims to support IT Governance frameworks. It is the only tool that is built around the COBIT 5 framework utilizing ISACA recommended process structure and implementation cycle. Its comprehensive and intuitive features help you align your organizational strategy, structures, processes and governance initiatives to best practices with proven results that are used by thousands of professionals worldwide.

Multiple viewpoints for Cobit 5 implementation for security management, service management, project management, change management, software development coupled with highly customizable real-time dashboards and predefined and on-demand reports make Process.Partners the leader in tools for IT Governance.

Hospitality Management Suite

by Sybrid

Sybrid services broadly encompass developing software from scratch that distinctively match your business necessities. Among these services, Sybrid hospitality management suite is the perfect answer to requirements and challenges faced by retailers, food chains and restaurants. The suite is a combination of Order management system, Point of Sales (PoS) application, inventory management system, and purpose built CRM application developed to cater individual customer needs. All these applications can be integrated to achieve in-depth customized reports for sales forecasting and business planning. The suite can be easily integrated with SYVOX (Sybrid Voice Services Suite) especially in a call center environments.

TallySIS

by TallyMarks Consulting

TallySIS is a real-time secondary sales tracking system which integrates with your current system, collects the distributor's sales/secondary sales information using state-of-the-art enterprise mobility solution. Our analytics provide Real-Time reporting of sales & stock data, resulting in dynamic decision making in logistics, warehouse management & manufacturing.

TallySIS is a user-friendly system and mobile client that will provide you with the benefits of a custom-made Distribution Channel Management.

We have a wide range of customers, to name a few, 80% of Pepsi Bottling Companies in Pakistan, United Snacks, Engro Fertilizers, Fauji Foods, Kashmir Oil and Global Beverage Company in Saudi Arabia.

YahClick

by Yahsat

YahClick is Yahsat's high-speed satellite broadband service, and is the leading satellite broadband Ka-band service across the Middle East, Africa, Central and South West Asia.

YahClick's footprint, which includes Pakistan, covers 28 countries and delivers satellite broadband to a wide range of sectors, including NGOs, government, finance and IT.

YahClick's connections are more reliable and much faster than traditional internet technologies, and bypass fixed line infrastructure, resulting in easier deployment. Above all, YahClick provides coverage over vast regions, irrespective of population density or remoteness.

Qlik®

by RevealSoft Middle East

Qlik® is the leading visual analytics platform and the pioneer of user-driven business intelligence. Its portfolio of on-premise solutions moves its offerings beyond visualization with support for a broad range of advanced geo-analytic use cases through which they meets customers' growing needs from reporting, self-service visual attractive analysis to guided, embedded and custom location analytics, regardless of where data is located. Customers using Qlik Sense®, QlikView® with Qlik Geo Analytics® gain meaning out of information from multiple sources, including geospatial context and exploring the hidden relationships within data through its unique associative engine that lead to insights that ignite good ideas.

TimeXtender

by RevealSoft Middle East

TimeXtender is a comprehensive new approach to business intelligence that brings together the best of both worlds: governance and self-service. It enables a business leader to rapidly access and interpret data they know they can trust. And it frees IT from tedious and redundant tasks that can readily be automated. The power of automation and makes it easy to access, model and govern data through the power of automation (Auto-generate documentation every step of the way). Unlike other approaches, which rely on a mix of tools and vendors for scripting, data prep, and data blending, TimeXtender is fully integrated, more iterative development cycles, respond to changes quickly and deliver faster time to value with fewer resources.

The Nutanix Solution

by ArcPoint Technologies

Nutanix delivers a comprehensive enterprise cloud platform that bridges the wide gap that exists between traditional infrastructure and public cloud services. The solution delivers turnkey infrastructure that integrates servers, storage and virtualization along with end-to-end systems management and operations management capabilities. This allows enterprises to deploy infrastructure in minutes and shift the focus to applications that power the business.

Nutanix converges the entire datacenter stack including compute, storage, storage networking, and virtualization. Complex and expensive legacy infrastructure is replaced by simple 2U appliances that enable enterprises to start small and scale one node at a time. Each server, also known as a node, includes Intel-powered x86 hardware with flash SSDs and HDDs. Nutanix software running on each node distributes all operating functions across the cluster for superior performance and resilience.

INTELLEKT kiosk

by C Square Consulting

After our successful launch of Feedback Kiosks and Internet Banking Kiosks in Pakistan, C Square Consulting is now pleased to introduce a new generation self-service digital kiosk solution, INTELLEKT kiosk. Envisioned as a more comprehensive and effective model for customer's digital engagement and enablement, and new-to-bank customer acquisition, INTELLEKT kiosk brings innovative hardware and software functionality that enables the opening of accounts, through both self-service and Video Assisted technologies; offers customer validation and check via biometric authentication from NADRA; and provisions Cash Deposit, Instant Issuance of Bank Debit Card for associated Wallet/Account, Account Services, Bill Payments, and much more.

IBM Power Systems

by GBM Pakistan

Open innovation to put data to work across the enterprise IBM Power Systems offer servers built with open technologies and designed for mission-critical applications. Today's business leaders demand servers designed for big data that are optimized, secure, and adapt to changing workload requirements. Business climates are changing, and organizations must provide an infrastructure that can quickly adapt to those changes. Successful organizations work smarter and faster with greater agility and flexibility. Cloud fundamentally changes the way IT builds new apps, delivers services and consumes compute and software resources. With new innovations, Power Systems provide the ability to:

- Gain faster insights with the POWER8 processor and smart acceleration enabled by CAPI (Coherent Accelerator Processor Interface) technologies such as FPGA accelerators for key workloads
- Achieve lower latency and smaller footprint with CAPI Flash
- Move data in and out of systems more quickly with twice the memory and I/O expansion
- Achieve greater speed and efficiency for database, transactional and other highly multi-threaded applications with transactional memory supported by 50 percent more cores and 2x the number of simultaneous threads per core

IBM® PowerVM® provides the industrial-strength virtualization solution for IBM Power Systems™ servers that run IBM AIX®, IBM i and Linux workloads.

THE REGION'S NUMBER ONE PROVIDER OF IT SOLUTIONS

IBM Power Systems

Open innovation to put data to work
across the enterprise

IBM Power Systems offer servers built with
open technologies and designed for
mission-critical applications.

IBM Data Storage

Win in the data-driven cognitive era
with IBM Storage

IBM Storage solutions provide the speed and
performance of ready data access with the
agility and efficiency of hybrid cloud and
software-defined storage.
